

CITY OF COQUILLE

The City of Coquille has received the results of the water testing and the water is now safe for drinking.

The Boil Water Advisory has been lifted for all addresses and it is no longer necessary to boil water.

If you have concerns feel free to flush your water line by letting the cold water run for 5 minutes.

The advisory was a precaution for our customers to limit risk to health from any possible harmful bacteria.

The City would like to thank all the water users for their patience and cooperation regarding this incident.
